---

## PROFILE SUMMARY

Senior Software Engineer with **3.8 years of experience in Web, Mobile, and API testing**, with strong hands-on exposure to **UI automation, mobile automation, API automation, and manual testing**. Experienced in building and executing automation frameworks using **Selenium, Appium, and Rest Assured**, along with a solid understanding of testing fundamentals, defect lifecycle, and agile processes. Known for a learning-first mindset, honest communication, and writing maintainable, reusable test code.

---

## TECHNICAL SKILLS

- **Languages:** Java
  - **Automation Tools:** Selenium WebDriver, Appium, RestAssure
  - **Frameworks:** TestNG, Cucumber BDD, Page Object Model, Open test
  - **Practices:** BDD, In-sprint Automation, Exploratory Testing
  - **Build & CI:** Jenkins, Git, Maven
  - **Cloud Platforms:** BrowserStack
  - **Project Tools:** JIRA, Confluence
- 

## WORK EXPERIENCE

### Capgemini Technology Services India Limited

Senior Software Engineer

**Previous Company | 3.8 Years**

- Worked on **Web, Mobile, and API testing** covering both **automation and manual testing** in an Agile environment
- Designed and executed **Selenium WebDriver (Java)** automation using **Page Object Model (POM)** with TestNG/Cucumber
- Automated **mobile application testing using Appium** for Android and iOS platforms
- Built and executed **REST Assured API automation POCs**, including request/response and JSON validation

- Performed **manual testing** (functional, regression, smoke, sanity) and managed defects using **Jira**
  - Collaborated with developers on **React Native applications** for testing, validation, and issue debugging
- 

## PROJECTS

### NOV

#### **Role: Manual Tester**

- Worked as a **Manual Tester** on the NOV application
- Analyzed requirements and prepared detailed test cases
- Performed **functional, regression, smoke, and sanity testing**
- Identified, logged, and tracked defects following the defect life cycle
- Collaborated with developers and stakeholders to validate fixes and ensure quality delivery

### Mcd

#### **Role: QA Automation / Tester**

- Worked on **mobile application testing** for the McDonald's app
  - Used **Appium** for automating critical mobile test scenarios
  - Explored and worked with the **Open Test Framework** for automation execution
  - Validated key user flows and application behavior on mobile devices
  - Assisted in improving test coverage through automation and exploratory testing
- 

## CERTIFICATIONS

- Agile Development Specialization – Coursera
  - Selenium Automation with GitHub Copilot – Udemy
-
